

FOR IMMEDIATE RELEASE

Innovative Earth Solutions, LLC implements comprehensive environmental risk management program to protect our environment

CERC Certificate awarded for business operations and promoting pollution prevention at work

Innovative Earth Solutions, LLC was named a Certified Environmentally Responsible Contractor (CERC). This certification is awarded to trade and general contractors who are leading the construction industry towards best management practices that prevent the release of toxic and hazardous pollutants into the environment.

“We are excited to join the environmental movement through CERC. The CERC program is leading the way through better business practices and practical solutions that result in a positive impact on the future of our environment.” stated Jack DiGangi at Innovative Earth Solutions, LLC.

Contracting activities have the potential to harm our environment and Innovative Earth Solutions, LLC is doing their part to mitigate the risks arising from operations and save our natural resources according to Environmental Risk Professionals. To be considered a Certified Environmentally Responsible Contractor (CERC) a company must demonstrate financial responsible for pollution cleanups and promote pollution prevention by implementing Best Management Practices (BMPs).
